Description

BitDefender Antivirus offers features that protect and safeguard your device from malware, spyware, adware, and ransomware. It encompasses specific application characteristics, including: a dedicated browser that secures banking and shopping transactions to prevent fraud; and web filtering technology to block certain networks.

BitDefender Antivirus provides anti-phishing protection, anti-fraud warnings, and an anti-spam filter. This plan also includes an anti-tracker

extension, social network protection, a password manager, a file shredder for permanently deleting files without leaving traces, a vulnerability assessment that scans and suggests solutions for outdated and vulnerable software, missing Windows security patches, and potentially unsafe system settings, among others.
